

iDAMX

**Integrated Data for
Asset Management
Excellence**

Build, Validation & Migration

Introduction

HCLTech iDAMX (Integrated Data for Asset Management Excellence) cloud-based solutions and services enables clients to build a digital transformation journey requires the consolidation of structured data and assets from various sources into a centralized engineering asset data foundation where the asset data is normalized, enriched and transferring data to next gen digital platform from document centric to data centric by having a single source of truth.

iDAMX Solution supports Information Management, CMMS Operation Readiness, Reliability and inventory Management fostering digital transformation, capital project handover and delivery of comprehensive transformations across asset life cycle. This empowers organizations optimize asset management by operational efficiency, reliability increasing profitability, reducing risk and cost by building more resilient operations

iDAMX solution build by leveraging AI/ML and adopting global asset management standards (CFIHOS/ISO 14224/15926) aligned ERP/ EAM workflow standards, simplify the clients to build structured asset data model using taxonomy and precisely transforms engineering data from various sources into high-quality structured data with integrated standardized workflows.

Market Key Challenges – Asset Management

1

Operations

- Increased Unplanned downtime
- Increased operational cost
- Reduced operation Efficiency
- Reduced yield

2

Maintenance

- Ad-hoc Maintenance of Assets
- Increasing Failure of ageing assets
- Higher reactive maintenance
- Difficulties in achieving in IT/OT Integration

3

Reliability Improvement

- Implementation of reliability programs
- Delay in embracing the digital
- Maintenance of complex systems
- Reduced awareness of reliability methodologies

4

Enterprise Asset Management

- Inability to meet critical business functionalities
- Integration of data sources and solutions
- Excessive customizations leading to ineffective usage
- High maintenance & support costs

5

Inventory Management

- Inconsistency of Material Master
- Non availability of critical BoM
- High inventory carrying costs
- Difficulties in predicting accurate demands

6

Data Management

- Siloed Operations with Disparate Systems
- Inconsistent Data Quality
- Uncertainty in Analytics implementation costs
- Enterprise-wide view of APM Data not available

iDAMX Integrated Solution

Information Management

- Define Document Matrix structure
- Document collection and classification
- Document naming conventions
- Document Associations
- Meta Data Capture

Asset Reliability

- Failure Mode Effect Analysis (FMEA)
- Equipment Criticality (ECA)
- Maintenance Strategies
- Maintenance activity types
- Maintenance Planning & Scheduling
- Work Order Management

Data Migration

- PM/MM Master Data Migration / upgrade
- Master Data inconsistency check
- Cleansing & De-Duplication Check

Operation Readiness

- Build Multi Level Asset Hierarchy
- Functional Location
- Equipment Strategies
- Class & Characteristics
- Catalog Profiles
- Bill of Materials (BoM)
- Global Template base classification

Spare Parts Management

- Data Strategy - Develop Taxonomy and Noun Modifier
- Cataloguing, Enrichment
- Deduplication, Standardization & Governance
- Critical Spares
- Assigned BoM
- Correct Inventory

Industry

Energy

Mining

Chemical

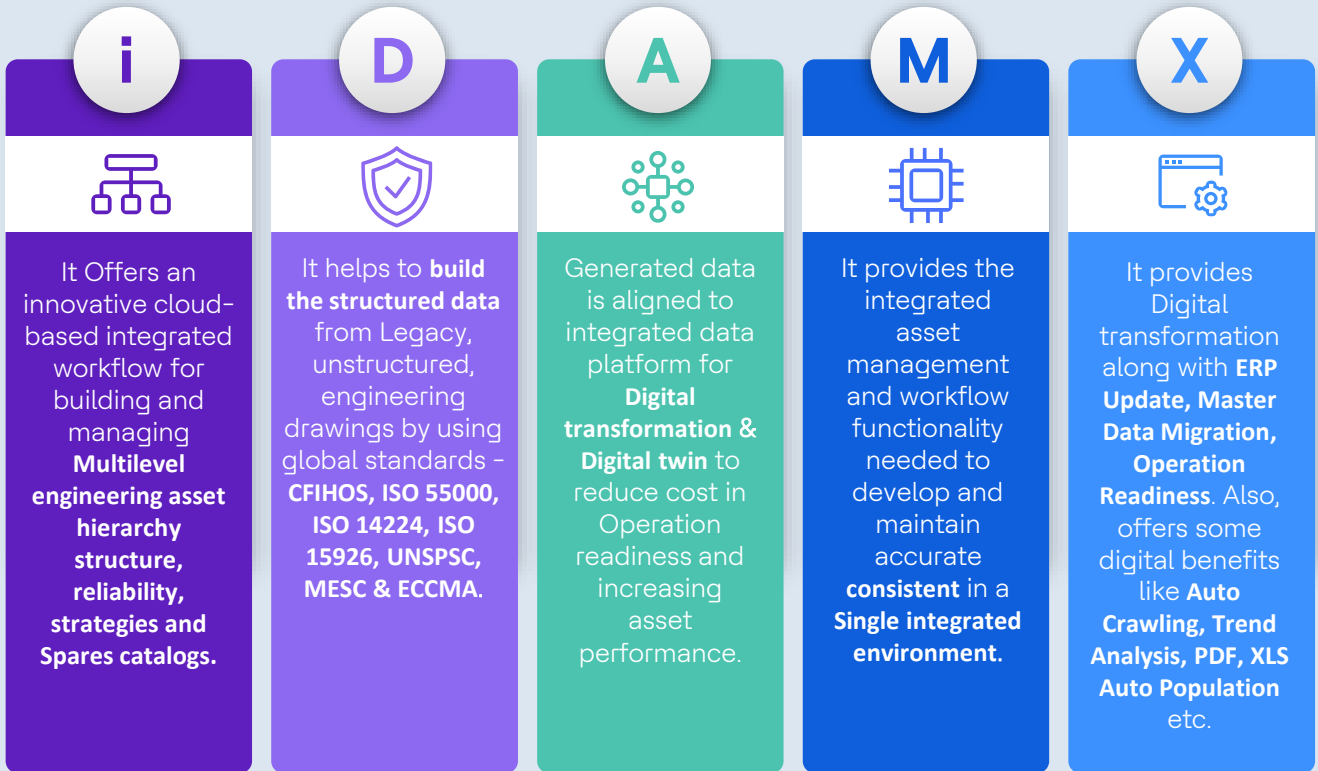

CPG

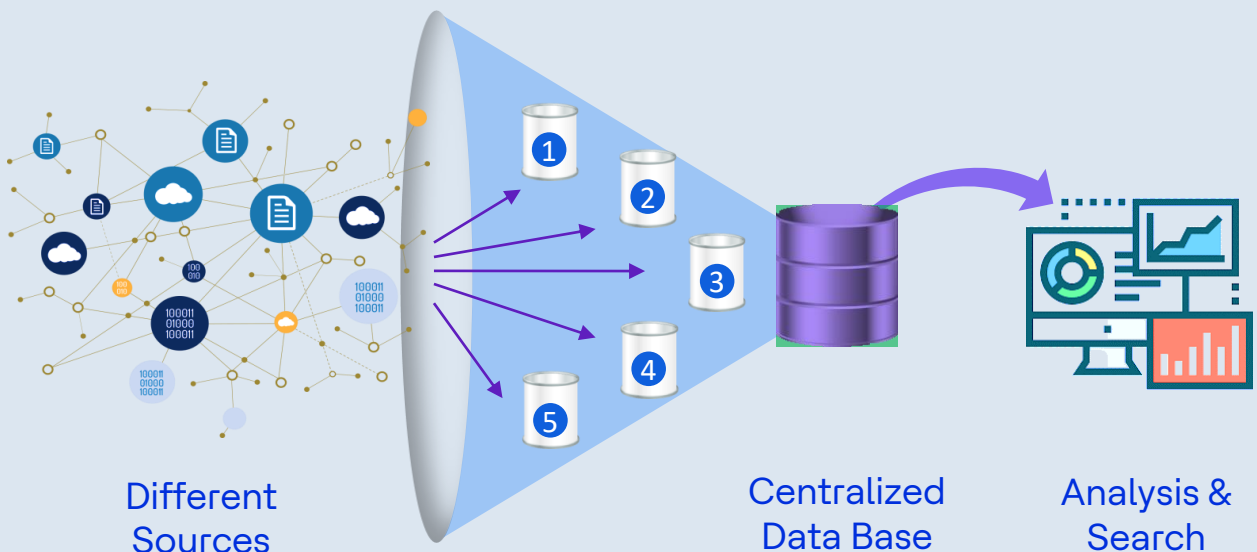

Product

iDAMX – Centralized Engineering Asset Data Model for Build & Migration

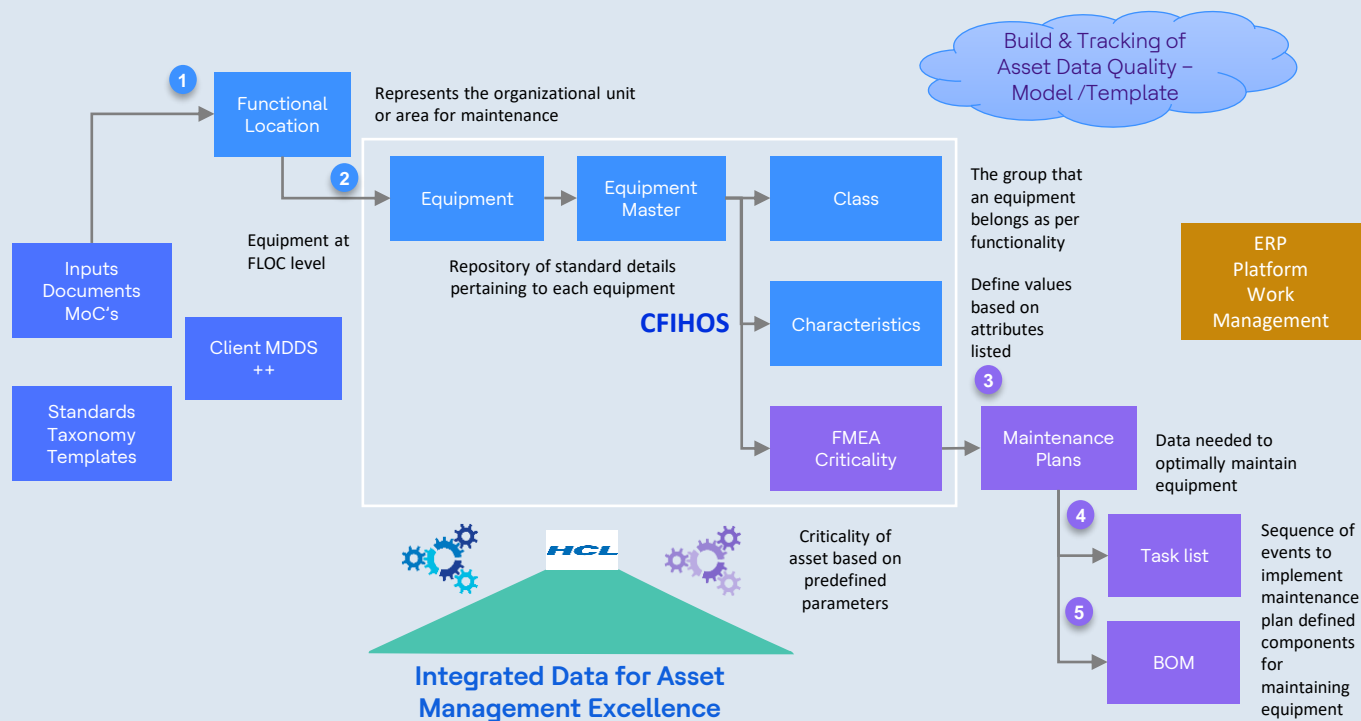

Harvesting, Enriching and Classifying by Global Standards

Cloud based Integrated Asset Management Solution

Document to Asset Data for Build & Migration and Digital Transformation

CFIHOS | ISO 55000 | ISO 15926 | ISO 15489 | ISO 14224 | UNSPSC | MESC | eClass

Benefits

1

Centralized & Contextualized Data – Digital Transformation

2

Data Governance, Model and Taxonomy

3

ERP / EAM Migration

4

Reduction in Cost – CAPEX IM Handover

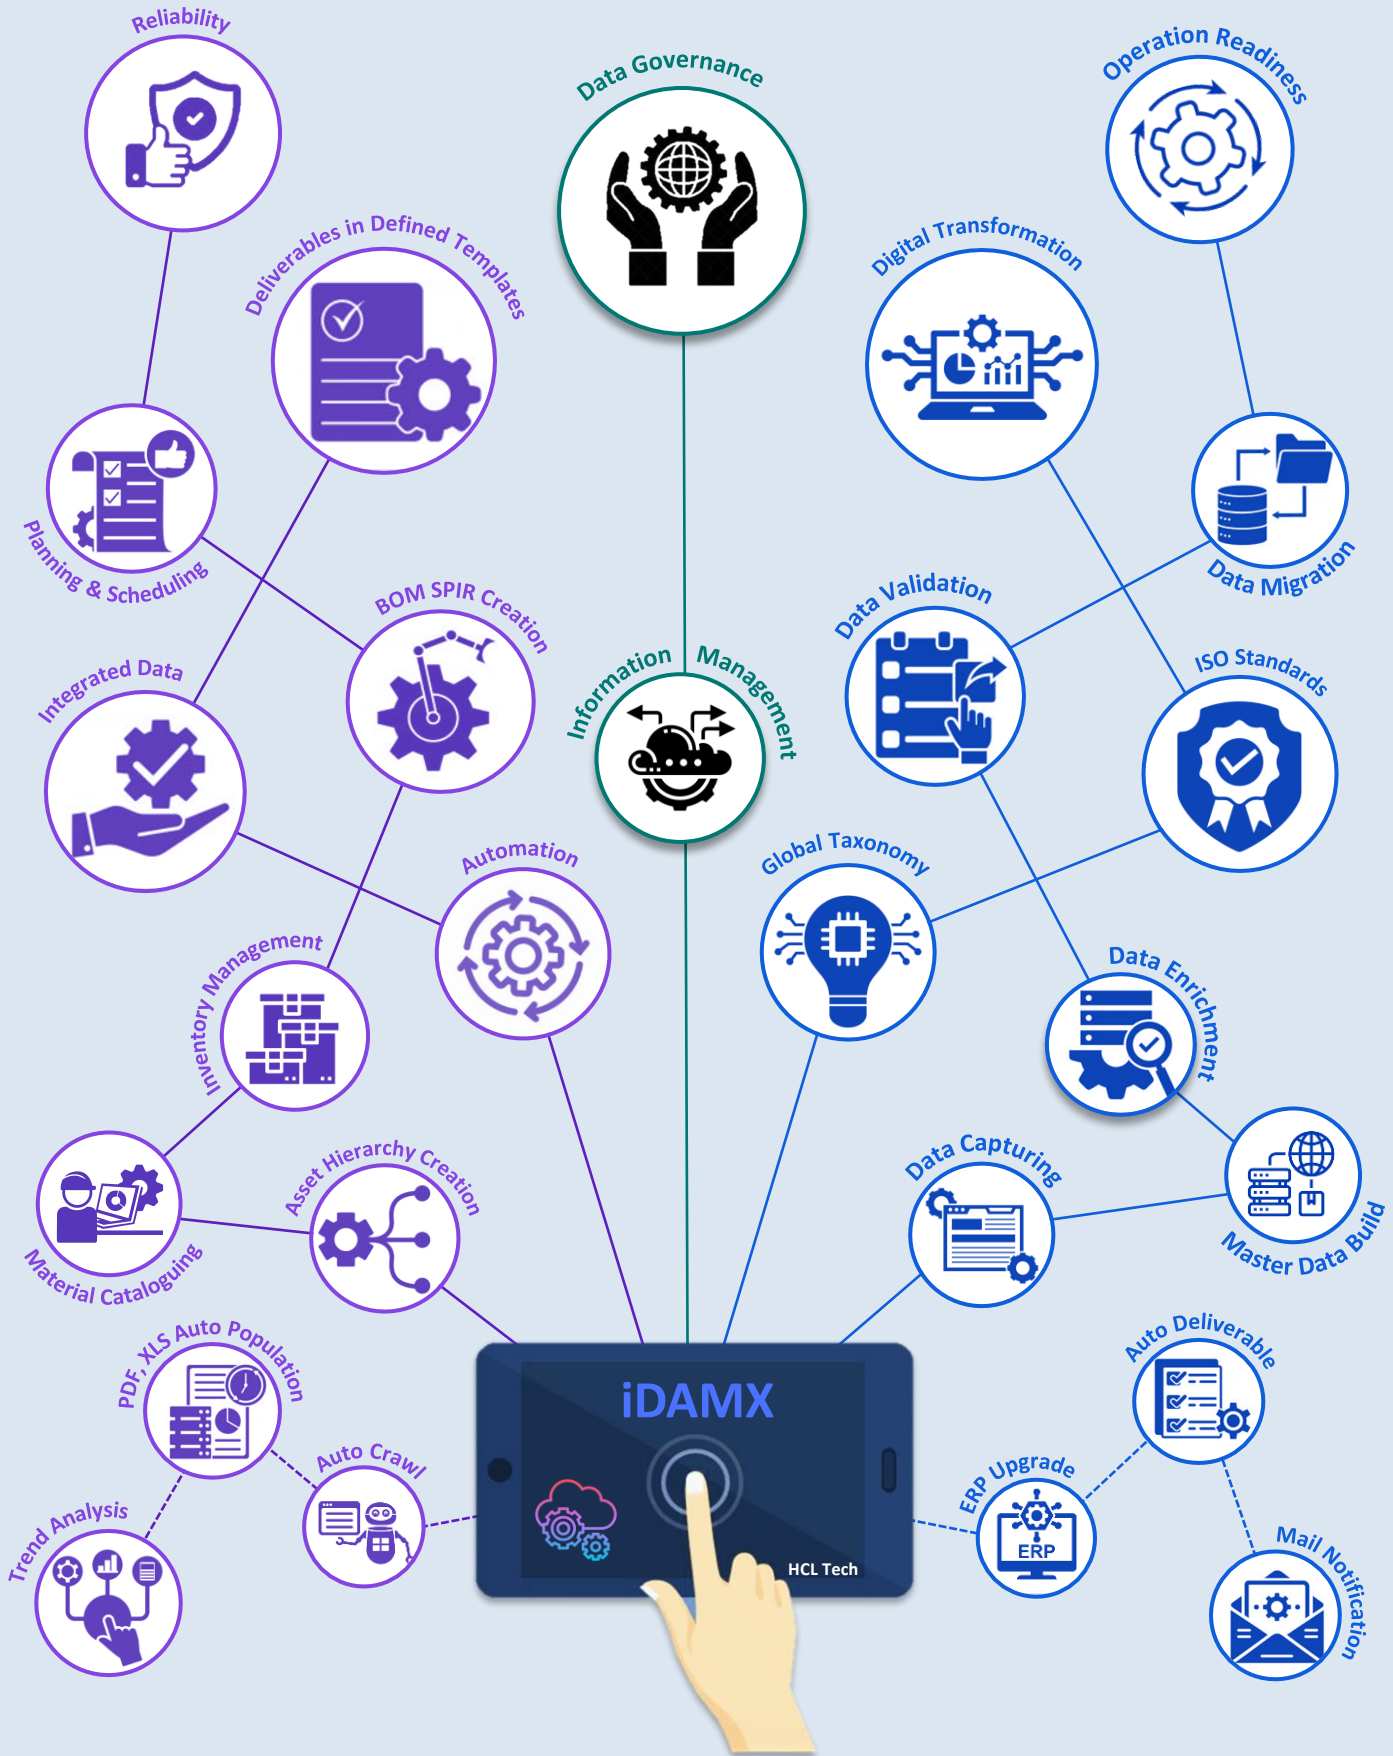

5

Increased Asset Utilization

6

Increased Asset Reliability

iDAMX – Solutions & Benefits

HCLTech | Supercharging Progress™

hcltech.com

HCLTech is a global technology company, home to 222,000+ people across 60 countries, delivering industry-leading capabilities centered around Digital, Engineering and Cloud powered by a broad portfolio of technology services and software. The company generated consolidated revenues of \$12.3 billion over the 12 months ended December 2022. To learn how we can supercharge progress for you, visit hcltech.com.
